FIP

ФИТИНГИ ИЗ ПВХ

- Диапазон диаметров от d 12 мм до d 500 мм и от R 3/8" до R 4"
- Виды соединений: kleевое, резьбовое, фланцевое
- Рабочее давление: максимальное рабочее давление 16 бар при температуре 20 °C (для воды)
- ПВХ фитинги, производимые FIP, подходят для транспортировки воды или питательных веществ и соответствуют всем необходимым стандартам и требованиям
- Уплотняющие прокладки изготавлены из EPDM или FPM
- Фитинги ПВХ, производимые FIP, соответствуют следующим сертификатам качества IIP n.122 (Италия), NF n.04 (Франция) и K5034 ND 10 (Голландия)

PVC pressure fittings

- Size range from d 12 mm up to d 500 mm and from R^{3/8}" to R 4"
- Jointing by solvent weld, flanging or threaded connections
- Pressure rating: max working pressure: 16 bar at 20° C (water)
- FIP U-PVC is suitable for conveying foodstuffs and drinking water and meets the necessary standards and regulations
- Sealing gaskets: EPDM or FPM
- Quality marks: IIP n. 122 (Italy), NF n. 04 (France) and K5034 ND 10 (Holland)

Raccords en PVC

- Gamme dimensionnelle de d 12 mm à d 500 mm, de R^{3/8}" à R 4"
- Jonction par collage aussi bien que par filetage
- Pression de service jusqu'à 16 bar à 20° C (eau)
- PVC à qualité alimentaire apte à l'utilisation avec l'eau potable et les aliments suivant les règlements en vigueur
- Joints en EPDM ou FPM
- Marques de qualité: IIP n. 122 (Italie), NF n. 04 (France), K5034 ND 10 (Pays-Bas)

Fittings aus PVC-U

- Abmessungsbereich von d 12 mm bis d 500 mm, von R^{3/8}" bis R 4"
- Verfügbar als Klebe-, Übergangs und Gewinde-Fittings
- Betriebsdruck max 16 bar bei 20° C (Wasser)
- Werkstoff entspricht den Empfehlungen des deutschen Bundesgesundheitsamtes und ist physiologisch und toxikologisch unbedenklich
- Dichtungen aus EPDM/FPM
- Gütezeichen: IIP n. 122 (Italien), NF n. 04 (Frankreich), K5034 ND 10 (Holland)

Marchi di qualità

MARCHIO DI CONFORMITÀ IIP N. 122 Raccordi in PVC rigido (non plastificato) per condotte di fluidi a pressione. Norme UNI-EN 1452. Ente preposto alla concessione: IIP ISTITUTO ITALIANO DEI PLASTICI -Italia.

Quality marks

I raccordi e le valvole FIP in PVC sono riconosciuti dal RINA (Registro Italiano Navale) per l'utilizzo su unità da diporto, a bordo di navi ed altre unità classificate dal RINA (dich. n. MAC/012/95).

Marques de qualité

MARQUE DE QUALITÉ NF N. 04 Raccords en PVC non plastifié: série pression à coller. Normes NF T54-028. Association de normalisation: AFNOR - ASSOCIATION FRANÇAISE DE NORMALISATION - France.

Gütezeichen

KIWA QUALITY MARK N. K5034 ND 10. Unplasticized PVC fittings: pressure range for solvent welding. Rules KIWA 54. Certifying official body: KIWA - KEURINGS INSTITUT VOOR WATERLEIDING ARTIKELEN - Holland.

**Знаки качества
Сертификат качества**

Вся продукция FIP, описанная в этом буклете, производится в соответствии с UNI EN 29002 ISO 9002.

Global quality system certification

All FIP products shown in this leaflet are manufactured in accordance with UNI EN 29002 ISO 9002 standard.

Certification du système de qualité globale

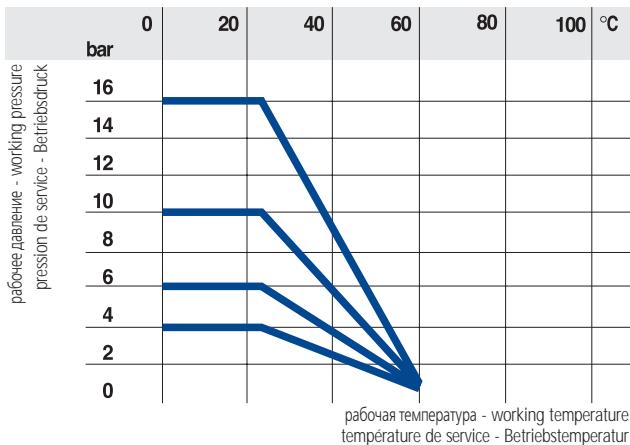

Tous les articles FIP illustrés dans le dépliant sont produits en système de qualité globale selon le standard UNI EN 29002 ISO 9002.

Zertifizierung des Qualitätssicherungssystems

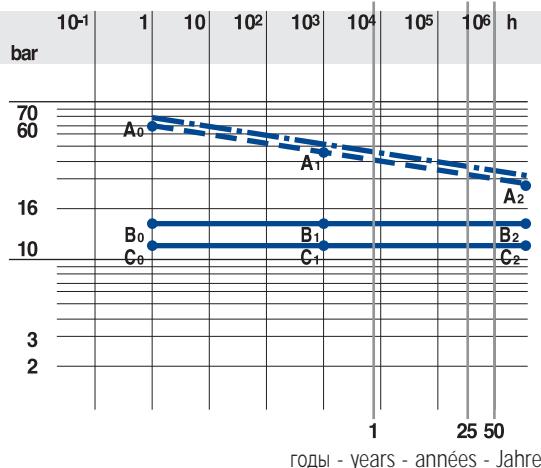

Alle FIP-Produkte in dieser Druckschrift unterliegen einem Qualitätssicherungssystem nach ISO 9002 bzw. UNI/EN 29002.

**3 ФАКТОРЫ БЕЗОПАСНОСТИ Ai/ Bi
или Ai/Ci для фитингов PN16
рабочее давление Pe/ время воз-
действия T**

НОМИНАЛЬНОЕ ДАВЛЕНИЕ
 Номинальное давление PN необходимо рассматривать как условное давление, в соответствии, с которым осуществляется выбор фитинга или фланца для требуемой области применения.
 Чтобы соответствовать факторам безопасности, максимально разрешенное рабочее давление, для длительной работы при 20 °C для транспортировки воды, должно быть равно номинальному давлению. Если иначе не указано, то должны быть приняты следующие номинальные давления для фитингов FIP:
 • цементная сварка:
 от d 12 мм до d 225 мм PN16
 от d 250 мм до d 315 мм PN 10
 • переходные фитинги:
 от d 16 мм до d 110 мм PN 16
 • резьбовые фитинги:
 от R 3/8" до R 4" PN 16

**SAFETY FACTORS Ai/Bi or Ai/Ci
at 20° C for PN 16 fittings
working pressure Pe/loading
time T**

NOMINAL PRESSURE
 Nominal pressure PN must be considered as conventional pressure, accordingly with, fittings and flanges should be selected for current application. Maximum allowed working pressure, for continuous use, at 20°C in conveying water must be equal to nominal pressure value in order to ensure correspondance to safety factors. If not otherwise stated nominal pressure of FIP fittings is as follows:
 • solvent welding fittings
 from d 12 up to d 225 PN 16
 from d 250 up to d 315 PN 10
 • adaptor fittings
 from d 16 up to d 110 PN 16
 • threaded fittings
 from R 3/8" up to R 4"
 PN 16

**FACTEURS DE SECURITÉ Ai/Bi ou
Ai/Ci à 20° C pour raccords PN
16 pression de service
Pe/periode de charge T**

PRESSION NOMINALE
 La pression nominale PN doit être interprété comme la pression conventionnelle selon laquelle les raccords sont projetés et choisis pour l'emploi. La pression maximale pour service continu à 20° C en cas de transport d'eau doit être égale à la valeur de pression afin d'assurer une correspondance aux facteurs de sécurité. A défaut de spécification, les pressions nominales des raccords FIP sont les suivantes:
 • raccords à coller
 de d 12 jusqu'à d 225 PN 16
 de d 250 jusqu'à d 315 PN 10
 • raccords d'adaptafion
 de d 16 jusqu'à d 110 PN 16
 • raccords filetés
 de R 3/8" jusqu'à R 4"
 PN 16

**SICHERHEITSFAKTOR Ai/Bi oder
Ai/Ci bei 20° C für Fittings PN
16 Betriebsdruck Pe/Zeit T**

NENNDRUCK
 Der Nenndruck (PN) muß als Bezuggröße verstanden werden, nach der Fittings berechnet und dem Bedarf stall entsprechend ausgewählt werden. Der maximal zulässige Betriebsdruck für Dauerbetrieb bei 20° C, bezogen auf Wasser darf den Nenndruckwert nicht überschreiten, womit sichergestellt ist, daß die in Fig. 2 aufgeführten Sicherheitsfaktoren erhalten bleiben.
 Fig. 1 zeigt die zulässigen maximalen Betriebsdrücke unter Berücksichtigung der Temperatur. Sofern nicht ausdrücklich anders vermerkt, haben FIP Fittings folgende Nenndrucksufen:
 • Klebefittings
 von d 12 bis d 225 PN 16
 von d 250 bis d 315 PN 10
 • Übergangsfittings
 von d 16 bis d 110 PN 16
 • Gewindefittings
 von R 3/8" bis R 4" PN 16

Данные, носят чисто информативный характер, FIP несет никакой ответственности за технические характеристики, которые напрямую не соответствуют международным стандартам. FIP оставляет за собой право вносить необходимые изменения в продукцию, описанную в данном буклете.

The data given in this leaflet are offered in good faith. No liability can be accepted concerning technical data that are not directly covered by recognized international standards. FIP reserves the right to carry out any modification to the products shown in this leaflet.

Les données contenues dans cette brochure sont fournies de bonne foi. FIP n'assume aucune responsabilité pour les données qui ne dérivent pas directement des normes internationales. FIP garde le droit d'apporter toute modification aux produits présentés dans cette brochure.

Alle Daten dieser Druckschrift wurden nach bestem Wissen angegeben, jedoch besteht keine Verbindlichkeit, sofern sie nicht direkt internationalen Normen entnommen wurden. Die Änderung von Maßen oder Ausführungen bleibt FIP vorbehalten.

Размеры

FIP производит полную гамму фитингов, муфтовые соединения, которых соответствуют следующим стандартам:

Клеевое соединение: ISO 727, UNI 7442/75, DIN 8063, NF T54-028, KIWA 54

Муфты для труб соответствуют ISO 161/1, UNI 7441/75, DIN 8062, NF T54-016, KIWA49

Резьбовое соединение: UNI ISO 228/1, DIN 2999, BS 21

Dimensions

FIP have produced a complete range of fittings whose couplings comply with the following standards:

Solvent welding: ISO 727, DIN 8063, NF T54-028, KIWA 54, UNI-EN 1452 coupling to pipes complying with ISO 161/1, UNI-EN 1452, DIN 8062, NF T54-016, KIWA 49.
Threaded couplings: UNI ISO 228/1, DIN 2999, BS 21.

R-PVC**Dimensions**

FIP a crée une gamme complète de raccords dont les raccords conformes aux normes suivantes:

Collage: ISO 727, DIN 8063, NF T54-028, KIWA 54, UNI-EN 1452 assemblés à des tubes selon ISO 161/1, UNI-EN 1452, DIN 8062, NF T54-016, KIWA 49.

Filetage: UNI ISO 228/1, DIN 2999, BS 21.

Dimensionen

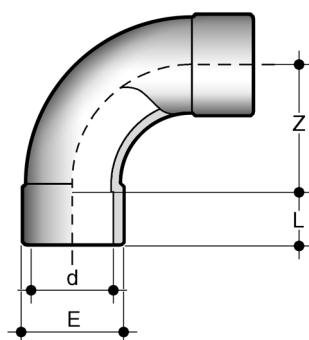

FIP-Fittings aus PVC-hart entsprechend in Ihren Anschlüssen folgenden Normen:

Klebefittings: ISO 727, DIN 8063 NF T 54-028, KIWA 54, UNI-EN 1452 und können verbunden werden mit Rohren nach ISO 1616/1, UNI-EN 1452, DIN 8062, NF T 54-016, KIWA 49.

Gewindefittings: UNI ISO 228/1, DIN 2999, BS 21.

ISO-UNI FITTINGS PVC-U

Solvent weld fittings, metric series

FITTINGS ISO-UNI

Series of fittings designed for conveying fluids under pressure with a cold chemical weld jointing system (solvent welding) using a suitable solvent cement and cleaner-primer.

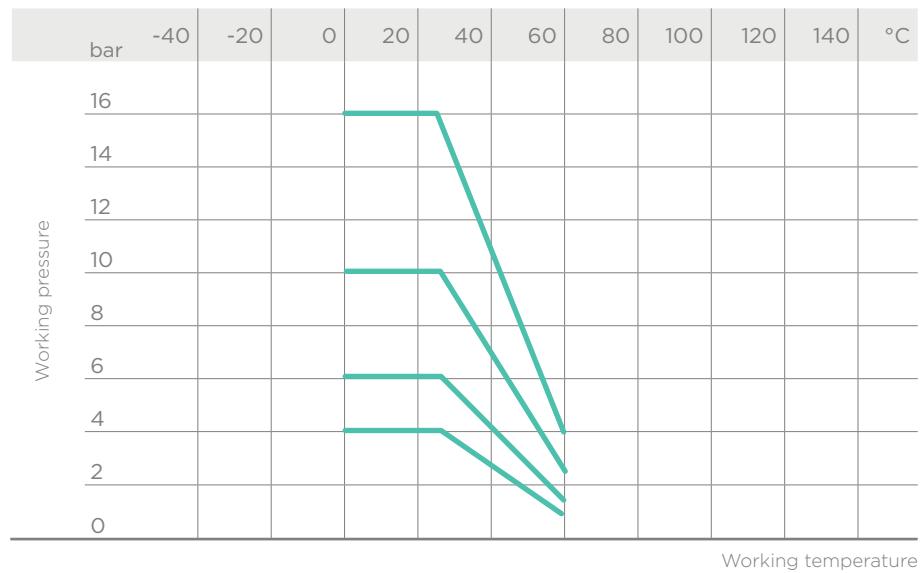

SOLVENT WELD FITTINGS, METRIC SERIES

Technical specifications	
Size range	d 12 ÷ d 500 (mm)
Nominal pressure	PN 16 with water at 20 °C
Temperature range	0 °C ÷ 60 °C
Coupling standards	Solvent welding: ISO 727, EN ISO 15493, DIN 8063, EN ISO 1452, ASTM D 2467, JIS K 6743, BS 4346-1. Can be coupled to pipes according to ISO 161-1, EN ISO 1452, EN ISO 15493, DIN 8062, ASTM D1785, JIS K6741, BS 3505-3506. Flanged couplings: DIN 2501, EN 1092-1
Reference standards	Construction criteria: EN ISO 1452, EN ISO 15493 Test methods and requirements: EN ISO 1452, EN ISO 15493 Installation criteria: DVS 2204, DVS 2221, UNI 11242
Fitting material	PVC-U
Seal material	EPDM, FPM

TECHNICAL DATA

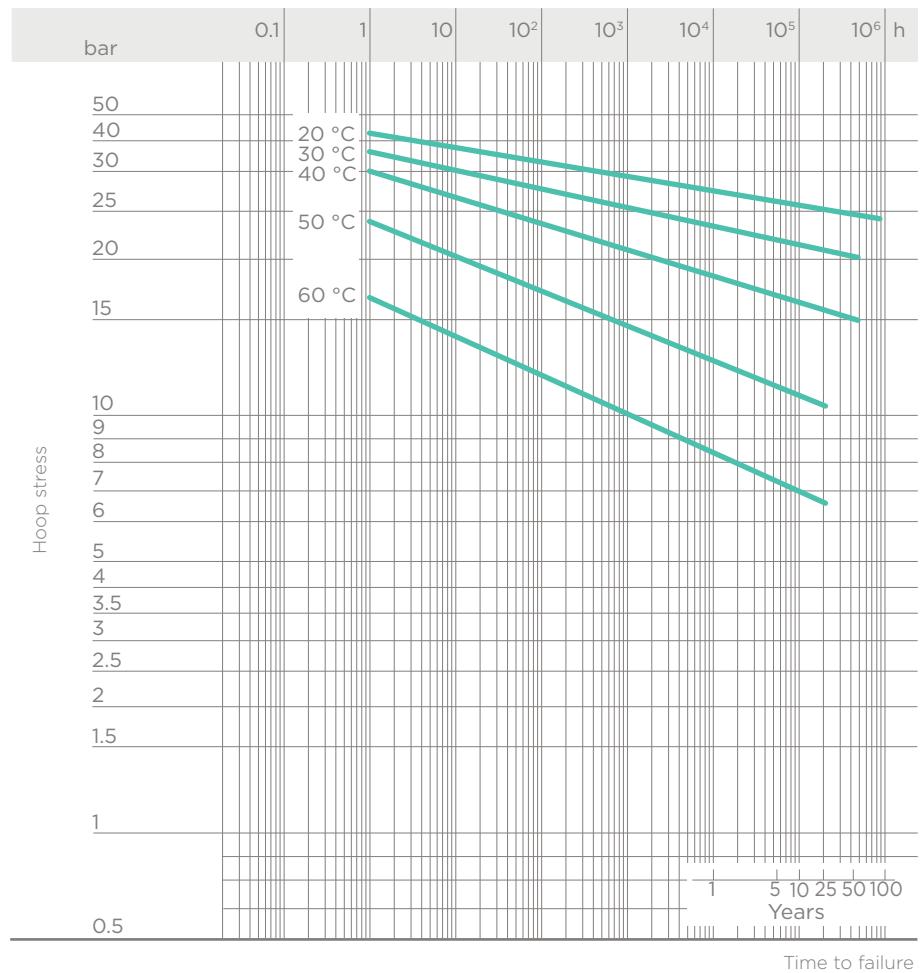

PRESSURE VARIATION ACCORDING TO TEMPERATURE

For water and non-hazardous fluids for which the material is classified as CHEMICALLY RESISTANT (life expectancy 25 years). In other cases, a reduction of the nominal pressure PN is required.

REGRESSION CURVE FOR PVC-U FITTINGS

Regression coefficients according to EN ISO 1452 and EN ISO 15493 for MRS (minimum required strength) values = 25 N/mm² (MPa) (classification PVC-U 250).

SAFETY FACTORS

The table reports the safety factors for each pressure class as a function of time.

Nominal pressure PN must be understood as being the standard pressure used for calculating and selecting the required fittings. In order to be able to comply with the safety factors, the maximum continuous working pressure at 20° C when conveying water must be the same as the nominal pressure values. Unless otherwise specified, the nominal pressures are as follows:

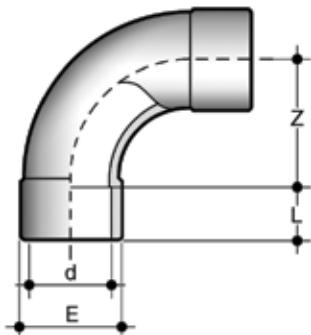

- solvent weld fittings
 - from d 12 to d 225 PN 16
 - from d 250 to d 315 PN 10
- adaptor fittings
 - from d 16 to d 110 PN 16
- threaded fittings
 - from R 3/8" to R 4" up to PN 16.

Some of the fittings in the series are sold as PN16 with a reduced safety factor compared to that specified by ISO standards.

Pe (bar)	1h	1000h	50 years	T
10	6.72	5.12	4	
16	4.2	3.2	2.5	
16*	3.3	2.5	2	

*with reduced safety factor

INSTALLATION

POSITIONING OF ZIKM AND ZAKM PIPE CLIPS

The installation of thermoplastic pipe systems requires the use of support clips to prevent flexing and the resulting mechanical stresses.

The distance between the clips depends on the pipe material, SDR, surface temperature and the density of the conveyed fluid.

Before installing the clips, check the distances reported in the table below, as provided for by guidelines DVS 2210-01 for water pipes.

Supporting PVC-U pipes conveying liquids of density 1 g/cm³ (water and other fluids of equal intensity).

For pipes of SDR 13.6 / S 6.3 / PN 16:

d mm	distance L in mm at different wall temperatures				
	≤ 20° C	30° C	40° C	50° C	60° C
16	950	900	850	750	600
20	1100	1050	1000	900	700

For pipes of SDR 21 / S 10 / PN 10:

d mm	distance L in mm at different wall temperatures				
	≤ 20° C	30° C	40° C	50° C	60° C
25	1200	1150	1050	950	750
32	1350	1300	1250	1100	900
40	1450	1400	1350	1250	1000
50	1600	1550	1500	1400	1150
63	1800	1750	1700	1550	1300
75	2000	1900	1850	1700	1450
90	2200	2100	2000	1850	1550
110	2400	2300	2250	2050	1750
125	2550	2450	2400	2200	1850
140	2700	2600	2500	2300	1950
160	2900	2800	2700	2500	2100
180	3100	2950	2850	2650	2200

For different SDR values, multiply the data in the table by the following factors:

1.08 for SDR 13.6 / S6.3 / PN16 size range d25 - d400

1.15 for SDR 11 / S5 / PN20 entire size range

Supporting PVC-U pipes conveying liquids of density other than 1 g/cm³.

If the liquid being conveyed has a density other than 1 g/cm³, the distance L in the table must be multiplied by the factors in the table below.

Fluid density in g/cm ³	Support factor
1.25	0.96
1.50	0.92
< 0.01	1.42 for SDR 21 / S10 / PN10 1.30 for SDR 13.6 / S6.3 / PN16 1.20 for SDR 11 / S5 / PN20

LERACCV Code

ISO-BSP FITTINGS PVC-U

Adaptor fittings

FITTINGS ISO-BSP

Series of fittings designed for conveying fluids under pressure with threaded and solvent weld cold chemical jointing systems (solvent welding) using suitable solvent cement and cleaner-primer.

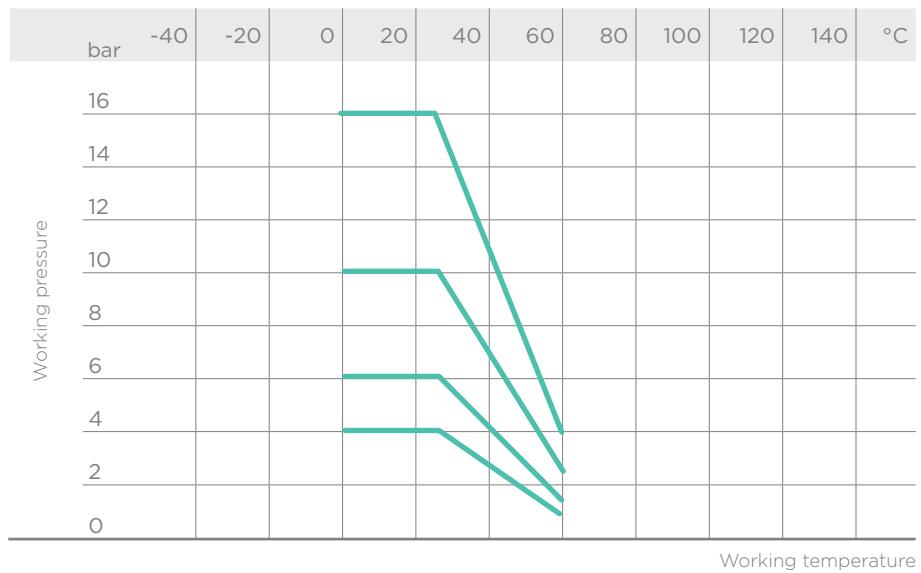

ADAPTOR FITTINGS

Technical specifications	
Size range	d 16 ÷ 125 (mm); R 3/8" ÷ 4"
Nominal pressure	PN 16 with water at 20 °C
Temperature range	0 °C ÷ 60 °C
Coupling standards	Solvent welding: ISO 727, UNI EN ISO 15493, DIN 8063, EN ISO 1452, ASTM D 2467, JIS K 6743, BS 4346-1. Can be coupled to pipes according to ISO 161-1, EN ISO 1452, EN ISO 15493, DIN 8062, ASTM D 1785, JIS K6741, BS 3505-3506 Thread: UNI ISO 228-1, DIN 2999, BS 21, ISO 7, ASTM D 2464, JIS B 0203
Reference standards	Construction criteria: EN ISO 1452, EN ISO 15493 Test methods and requirements: EN ISO 1452, EN ISO 15493 Installation criteria: DVS 2204, DVS 2221, UNI 11242
Valve material	PVC-U
Seal material	EPDM, FPM

TECHNICAL DATA

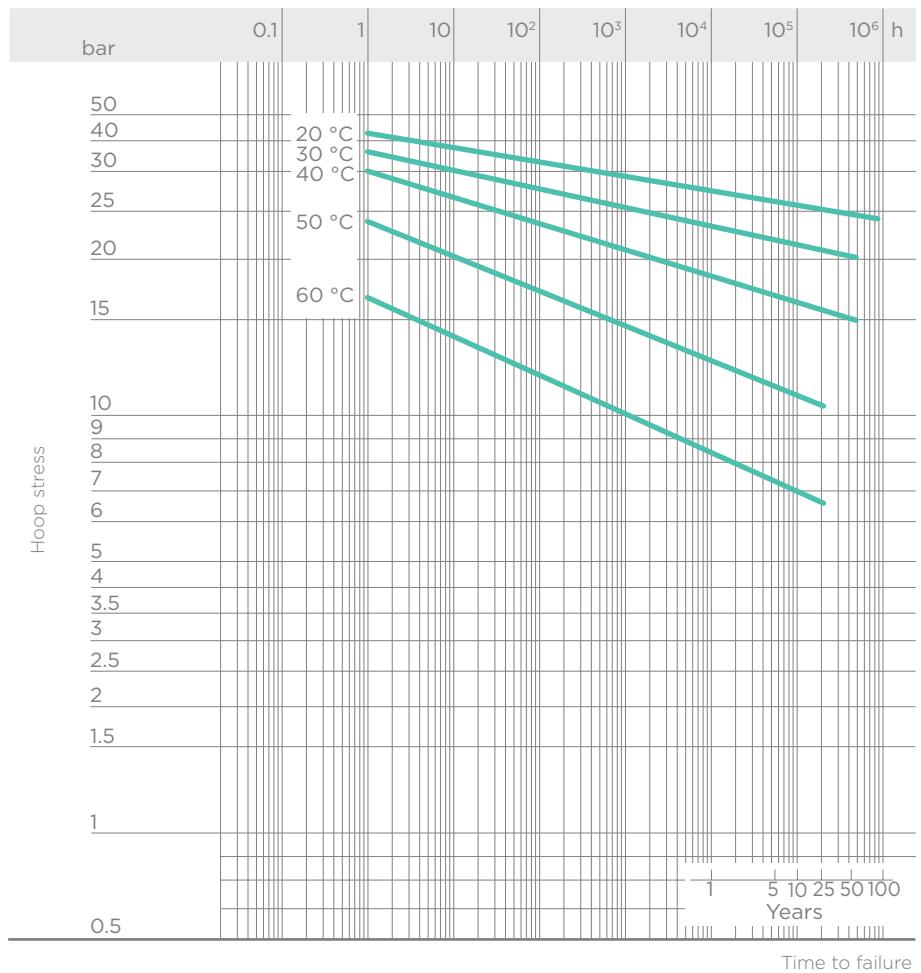

PRESSURE VARIATION ACCORDING TO TEMPERATURE

For water and non-hazardous fluids for which the material is classified as CHEMICALLY RESISTANT (life expectancy 25 years). In other cases, a reduction of the nominal pressure PN is required.

REGRESSION CURVE FOR PVC-U FITTINGS

Regression coefficients according to EN ISO 1452 and EN ISO 15493 for MRS (minimum required strength) values = 25 N/mm² (MPa) (classification PVC-U 250)

SAFETY FACTORS

The table reports the safety factors for each pressure class as a function of time.

Nominal pressure PN must be understood as being the standard pressure used for calculating and selecting the required fittings. In order to be able to comply with the safety factors, the maximum continuous working pressure at 20° C when conveying water must be the same as the nominal pressure values. Unless otherwise specified, the nominal pressures are as follows:

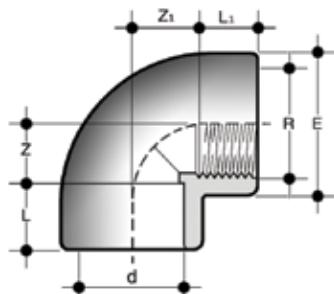

- solvent weld fittings
from d 12 to d 225 PN 16
from d 250 to d 315 PN 10
- adaptor fittings
from d 16 to d 110 PN 16
- threaded fittings
from R 3/8" to R 4" up to PN 16.

Some of the fittings in the series are sold as PN16 with a reduced safety factor compared to that specified by ISO standards.

Pe (bar)	1h	1000h	50 years	T
10	6.72	5.12	4	
16	4.2	3.2	2.5	
16*	3.3	2.5	2	

*with reduced safety factor
